Relationships with ancient and recent past are explored in photographs by Trish Simonite and Richard Nitschke. The landscape beneath the surface reveals something mysterious yet familiar between layers of color and texture. The work has both personal and universal meaning that cannot be known in a single snapshot. These images invite consideration to sift through and between time and place.

BETWEEN TIME AND PLACE features fine art photography by Richard Nitschke and Trish Simonite as part of 2019 Fotoseptiembre USA International Photography Festival.

The exhibition is also part of the 2019 Comfort Art Festival on Saturday, September 21, with artist talks in the afternoon.
